

Dear Prospective Sponsor,

Baton Rouge STEM was born out of a love for engineering and a passion for educating children. We believe that STEM is integral to every aspect of our life. Our mission is to integrate STEM into classroom learning in alignment with college and career readiness standards. We do this by helping students, educators, and parents to see the connection to STEM in the classroom and in life.

We carry this out in several ways such as our BRSTEM Fellows program, our series of school integrated workshops and community and special events. Each of these programs provide students in grades K through 12 with opportunities to practice the skills they learn in their classrooms in ways that are relevant to their lives and their aspirations

Partnering with business and community leaders as yourself, helps to make this all possible. In addition to our programming in 8 area schools, this spring we will be hosting STEM festivals at 6 area BREC community or neighborhood parks. Our goal this spring is to provide 2,000 additional youth in our community with STEM exposure through these festivals which will give them a clear pathway towards careers in the STEM fields. Please see the attached sponsorship form for STEM festival locations and sponsorship engagement opportunities. Thank you for your time and consideration.

Best Regards,

Eric B. Lewis  
Director
